## *Movies-*

**TRON: Legacy...**Jeff Bridges is still playing 'the Dude.' And TRON abides.

**Delta Force...**The movie with the theme song of Chuck Norris's beard.

**To Live & Die in LA...**Since all things 80s are new again. On deck - interpretive art dancing.

**Not Avatar...**I liked the plot better when it was called 'On Deadly Ground' with Steven Seagal and had no oversized Smurfs. And bigger fucking explosions. With Michael Caine.

**\*3D movies all suck.**

---

## *TV Shows-*

**Top Gear...**The BBC-real version; because our American version is for poofs.

**True Blood** - Eric is sooo hot.

**Weeds** - One word: Legendary!!!! (Yeah, that's from an earlier season, but much like HBO's 'Big Love,' this season was a fever dream...But I'd still carpet throttle Mary Louise-Parker).

**Justified...**FX is the only thing Fox-related I like. The Simpsons? Gay.

**South Park...**Look out for the 2011 spinoff...Buena Vista! Come see another Colorado mountain town, except not funny and riddled with meth!

**NFL Red Zone...**The peanut butter to my TV's jelly on Sundays.
